

BPE Celebrates 25 Years of Powering Progress with Purpose and Global Impact

Greater Noida, July 18, 2025 — Best Power Equipments (BPE), a leader in critical power solutions, celebrated its 25th anniversary with a grand Silver Jubilee event in Greater Noida. The evening brought together over 350 partners, dealers, team members, and international associates in a celebration that blended cultural richness with recognition and gratitude.

What started in 2000 with an investment of just ₹1.5 lakh has grown into a ₹500 crore enterprise with a presence in over 20 countries. Today, BPE plays a key role in powering essential infrastructure across the globe — from supporting PLN in the Philippines, Airtel operations across Africa, and the Treasury Department in Vietnam, to ensuring uninterrupted energy in leading Malaysian universities.

“This journey began with a simple need — reliable power,” said the company’s founder and group managing director MR Amitansu Satpathy. “Without vision, you can’t grow. Be limitless. The world is your market.”

The entire event was dedicated to honouring those who have shaped BPE’s story. Over 200 awards were presented during the evening, celebrating exceptional contributions from dealers, distributors, and employees across regions. Traditional performances and moments of reflection added warmth and pride to the occasion.

Founder Suryasikha Satpathy remarked, “The key to success is being comfortable with being uncomfortable. That mindset has driven our growth and shaped our culture from the beginning.”

BPE’s rise to global leadership is matched by its commitment to inclusive progress. Through its CSR initiative, **Omkar Gadi**, the company is bringing mobile digital classrooms to rural India — enabling access to education and technology in under-resourced communities.

Looking ahead, BPE is focused on accelerating its growth, with a goal of reaching ₹1000 crore in revenue over the next three years. The company remains dedicated to expanding its global footprint while continuing to innovate in the field of power solutions. The Silver Jubilee was

more than a celebration — it was a tribute to people, purpose, and a vision that continues to grow stronger with time.
